### CLAIM AMENDMENTS

1. (Currently Amended) A descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, the method including the steps of:
  - a) from a ~~user~~ entity who owns or represents a right to multiple profiles, electronically receiving a transaction having therein a first partial profile;
  - b) using the first partial profile, electronically searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said electronic searching will always yield at least one proximate second partial profile to the first partial profile;
  - c) i) between the ~~user~~ entity and the databank, electronically contracting for a royalty payment for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or  
  
ii) between the ~~user~~ entity and the databank, electronically contracting for a royalty payment for the ~~user~~ entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially

Appn. Number 09/593,993 (Shkedi) GAU 3629 Amnt. C contd.

3

thereafter the databank transmitting to the ~~user~~ entity the second mutually agreed portion of the second profile.

2. (Previously Presented) The method according to claim 1 wherein electronically receiving a transaction includes extracting at least one predetermined key portion of the first partial profile, wherein at least one of these extracted predetermined key portions is then used as the first partial profile for the electronic searching of the databank.
3. (Previously Presented) The method according to claim 2 wherein extracting includes constructing at least one composite key for the electronic searching of the databank using a combinatorial of at least two of the predetermined key portions of the first partial profile.
4. (Currently Amended) The method according to claim 1 wherein electronically contracting includes selecting a pricing structure according to a rating of the ~~user~~ entity.
5. (Previously Presented) The method according to claim 1 wherein electronically contracting a right includes accepting an obligation to pay for substantially each use or transfer of the agreed portion.

Appn. Number 09/593,993 (Shkedi) GAU 3629 Amnt. C contd.

4

6. (Original) The method according to claim 1 wherein incorporating the agreed portion includes assigning a credibility weighting to the agreed portion of the first profile.
7. (Original) The method according to claim 6 wherein incorporating includes convoluting the assigned credibility weighting of the first profile with a pre-existing credibility weighting of a substantially like agreed portion of a proximate second profile; and storing the convoluted new credibility weighting for the agreed portion in the databank.
8. (Previously Presented) The method according to claim 7 wherein electronically contracting includes selecting a pricing structure according to a result of a computation comparing the new credibility weighting with the pre-existing credibility weighting.
9. (Previously Presented) The method according to claim 1 wherein electronically receiving a transaction includes consulting an external database.

Appn. Number 09/593,993 (Shkedi) GAU 3629 Amnt. C contd.

5

10. (Previously Presented) The method according to claim 1 further including

- i) electronically searching at least one external database for a partial profile or portion thereof which complements a at least one second partial profile of the databank, and
- ii) between the database and the databank, electronically contracting for the databank to own or represent a right to a first mutually agreed portion of the complementing first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile.

11. (Currently Amended) A computer program product including a computer usable medium having computer readable program code embodied therein for facilitating descriptive profile mercantile activities, the computer readable program code including:

- a) first computer readable program code for causing a computer to receive a transaction from a user entity who owns or represents a right to multiple profiles, the transaction having therein a first partial profile;
- b) tied to the first computer readable program code, second computer readable program code for causing the computer to use the first partial profile to search a databank having a plurality of second partial profiles, wherein is included

Appn. Number 09/593,993 (Shkedi) GAU 3629 Amnt. C contd.

6

in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile; and

c) tied to the second computer readable program code, third computer readable program code:

i) for causing the computer to contract for a royalty payment between the user entity and the databank for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter for said databank to incorporate the agreed portion of the first profile into at least one second partial profile; or

ii) for causing the computer to contract for a royalty payment between the user entity and the databank for the user entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter for the databank to transmit to the user entity the second mutually agreed portion of the second profile.

12. (Currently Amended) A program storage device readable by machine, tangibly embodying a program of instructions executable by the machine to perform method steps for a descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith

Appn. Number 09/593,993 (Shkedi) GAU 3629 Amnt. C contd.

7

a maintained databank of partial profiles, said method steps including:

a) from a user entity who owns or represents a right to multiple profiles, receiving a transaction having therein a first partial profile;

b) using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;

c) i) between the user entity and the databank, contracting for a royalty payment for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or

ii) between the user entity and the databank, contracting for a royalty payment for the user entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user entity the second mutually agreed portion of the second profile.

Appn. Number 09/593,993 (Shkedi) GAU 3629 Amnt. C contd.

8

13. (Currently Amended) A computer system for facilitating a descriptive-profile mercantile method, the system including:

- a) a computer installed at a juncture in a data-communications topology;
- b) associated with said computer, a storage device for keeping a maintained databank of partial profiles; and
- c) associated with the internal functionality components of the computer, appurtenances for performing method steps including:
  - i) from a ~~user~~ entity who owns or represents a right to multiple profiles, receiving a transaction having therein a first partial profile;
  - ii) using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;
  - iii) (1) between the ~~user~~ entity and the databank, contracting for a royalty payment for the databank to own or represent a right to a first mutually agreed portion of the

9

first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or

(2) between the user entity and the databank, contracting for a royalty payment for the user entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user entity the second mutually agreed portion of the second profile.
